

redysign

Towards a recyclable,
biobased and smart alternative
for fresh meat packaging

Maximum use of wood as raw material via
high-tech valorization of its natural constituents
for a complete plastic-free packaging solution

Highly resource-efficient technologies
for a low-energy, low-water and
low-chemical production process

Packaging smartization
to prevent food spoilage through
the incorporation of sensors

More efficient recycling through automatic
sorting, advanced oxidation treatments
and upcycling of complex fractions
